

Centrifugal Mono Submersible Pumps

APPLICATIONS

Swimming pools
Deep wells, Sprinkler
Drip Irrigation
Pumping water from
small & big sumps in apartments

FEATURES

Compact, Efficient and reliable in operation
Easy Installation
Designed to operate under wide
voltage fluctuations
No need to separate Foot valve
Lower consumption
The foundation is not required

CONSTRUCTION

Impeller : Noryl
Inbuilt Thermal Overload Protector
Seal : Ceramic & Graphite
Wet type squirrel cage induction motor

S. No.	HP	Stage	TYPE	Pipe Size (mm)	Centrifugal Mono Submersible Pumps (Horizontal)											
					Discharge in LPM
